

## **MHA VACANCIES**

We're always looking for the right people who can help us develop and deliver our helpdesk, e-learning and consulting services.

In the near future we anticipate a need to bring on board people that can help us develop:

### **E-learning**

We need bright, independent, articulate, computer literate people who are enthusiastic about developing learning solutions in a financial crime context. We produce highly customised e-learning solutions in fraud prevention, AML/CTF, anti-bribery and corruption, market abuse and data security.

### **Helpdesk**

We need problem solvers, quick thinkers, IT proficient and experienced people who have dealt with financial crime matters and who are able to quickly turn round a range of financial crime related queries from clients from different sectors. Our clients almost invariably fall within the scope of the Third EU AML Directive.

### **Consultants**

We need both full time and part time resources to cope with the ever changing demand for consulting support, which includes AML/CTF & Sanctions risk assessments, financial crime policies and procedures, support when dealing with supervisory bodies, content support for our e-learning, support for the above mentioned help desk

### **When interested please contact:**
